Education

Union University Faculty of Computing (RAF) — Belgrade, Serbia
B.Sc. in Computer Science — *Oct 2024 - Present*

Electrical Engineering High School "Nikola Tesla" — Belgrade, Serbia
High School Diploma in Electrical Engineering — *Sep 2020 – Jun 2024*

Experience

LogistIQ Consulting — Belgrade, Serbia
Software Engineer — *Jun 2026 – Present*

Currently working in an IT team that develops a platform for monitoring margins in logistics like contracts, invoices and financial recoveries. My responsibilities include:

- Developing UI components for an AI copilot and document import workflows using **React**, with a Python backend built with **FastAPI**.
- Implementing client-side authentication and user management, such as RBAC, login, and invitations.
- Managing tasks and sprints through **Jira**.

Atlantic Grupa — Belgrade, Serbia
Software Engineer Intern — *Mar 2025 – Apr 2025*

- Provided IT support including OS reinstallation and workstation setup, tracking everything via **Jira**.
- Participated in various meetings of different departments with senior leadership.
- Completed The Data Processing and Analytics Course covering **NumPy** and **Pandas**.

techtonnik — Belgrade, Serbia
Software Engineer Intern — *Jun 2023 – Oct 2023*

- I was working on the Admin Panel using **React**, **TypeScript**, **Node.js**, and **Express** with a **PostgreSQL** database designed from scratch.
- Also worked on smaller full-stack Web Applications that were deployed to production using **Docker**. I participated in regular weekly company meetings.

Freelance — Remote
Software Engineer — *Aug 2022 – Present*

- Created CRUD Applications for various clients, including a US-based Logistics Company where I created a tracking dashboard using **Vue.js** and **Quasar**.
- Another project worth mentioning is the admin panel for the Balkan Cultural Center, which was built with **React**, **TypeScript**, and **RTK Query**.
- Also worked on smaller projects such as websites for various newspapers, interior design firms and websites for lawyers. I worked in smaller teams, and managed tasks and sprints through **Jira**.
